Software Solutions, Research Intelligence, Elsevier

Overview

1. Introduction to Pure
2. Current functionality in Pure
 1. Export: Personal User & Administrator
 2. ORCID as an import source
3. Improvements to ORCID functionality in Pure
 1. Latest Improvements
 2. Planned improvements

A Research Information Management System (RIMS)

from cataloging publications

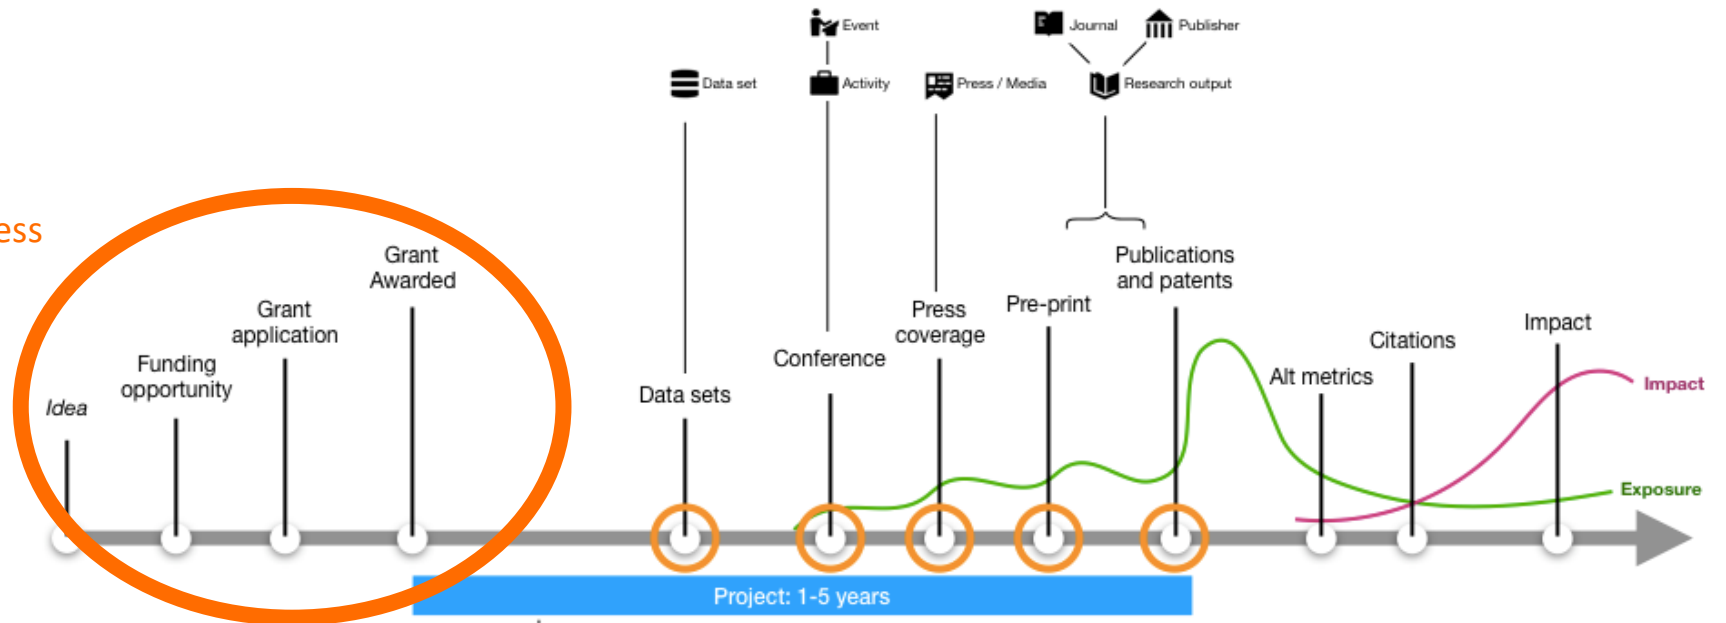

...to cataloging research assets

Credit: Scott Warren, AUL Syracuse University, USA

Pure records data across the research lifecycle

Insight in funding success rate helps to manage improvement.

Content type: **Project**

Data source: **Manual entry / updated when related content is added to the project**

Stakeholders: **Project participants / Research office**

Interrelations: **Application / Award / Project / Persons / Organisational units / Datasets / Research outputs / Activities / Prices / Impact**

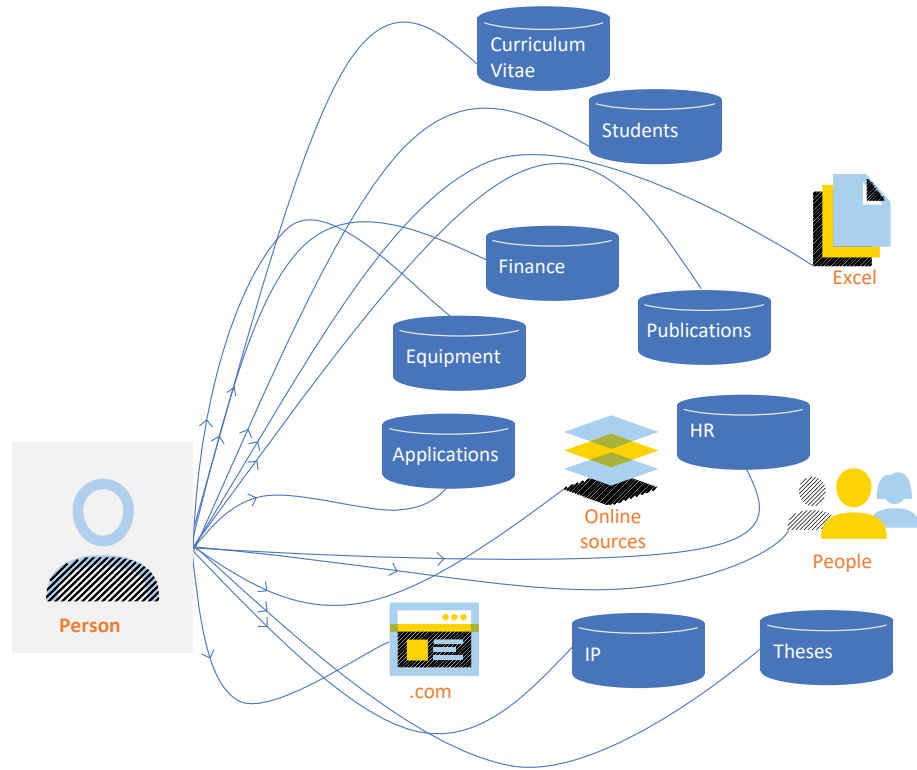

Report: **Outcome / Budget / Spend**

- Dimensions: **person / organisational unit / dates / keywords / type / funder**

Portal: **Yes**

Web service: **Yes**

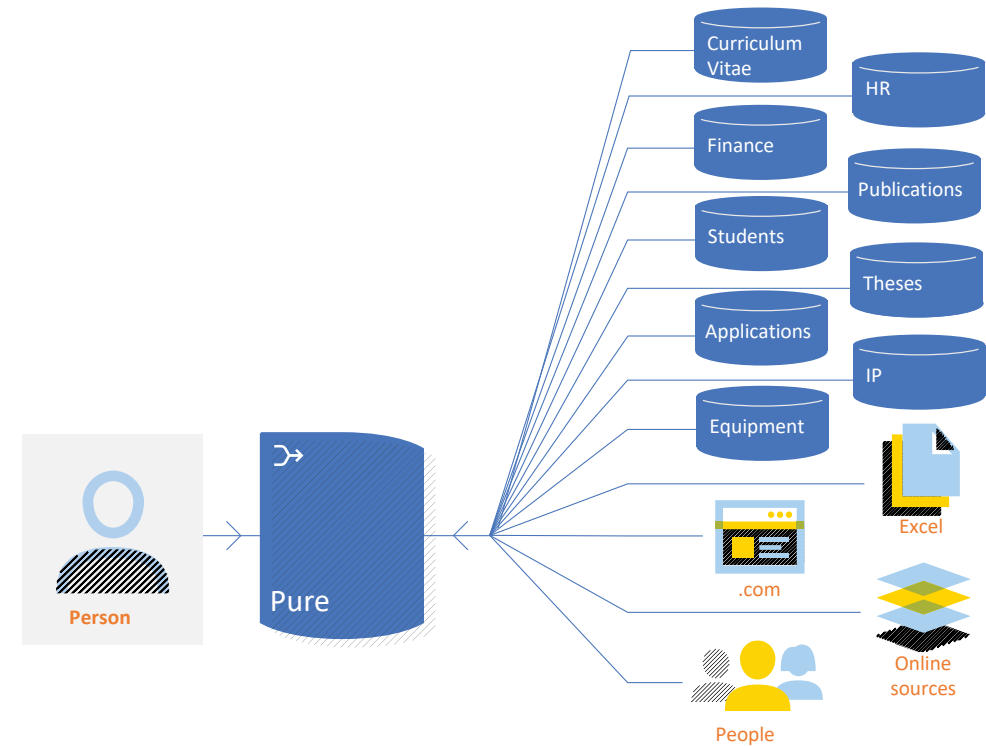

Integrating Disconnected Data Sources

Disconnected Data Sources

Complicates research management, administration and networking and collaboration

| Multiple IDs |
|-------------------------------|
| Disparate information |
| Disconnected data |
| Non-homogeneous data |
| Available at high cost in FTE |

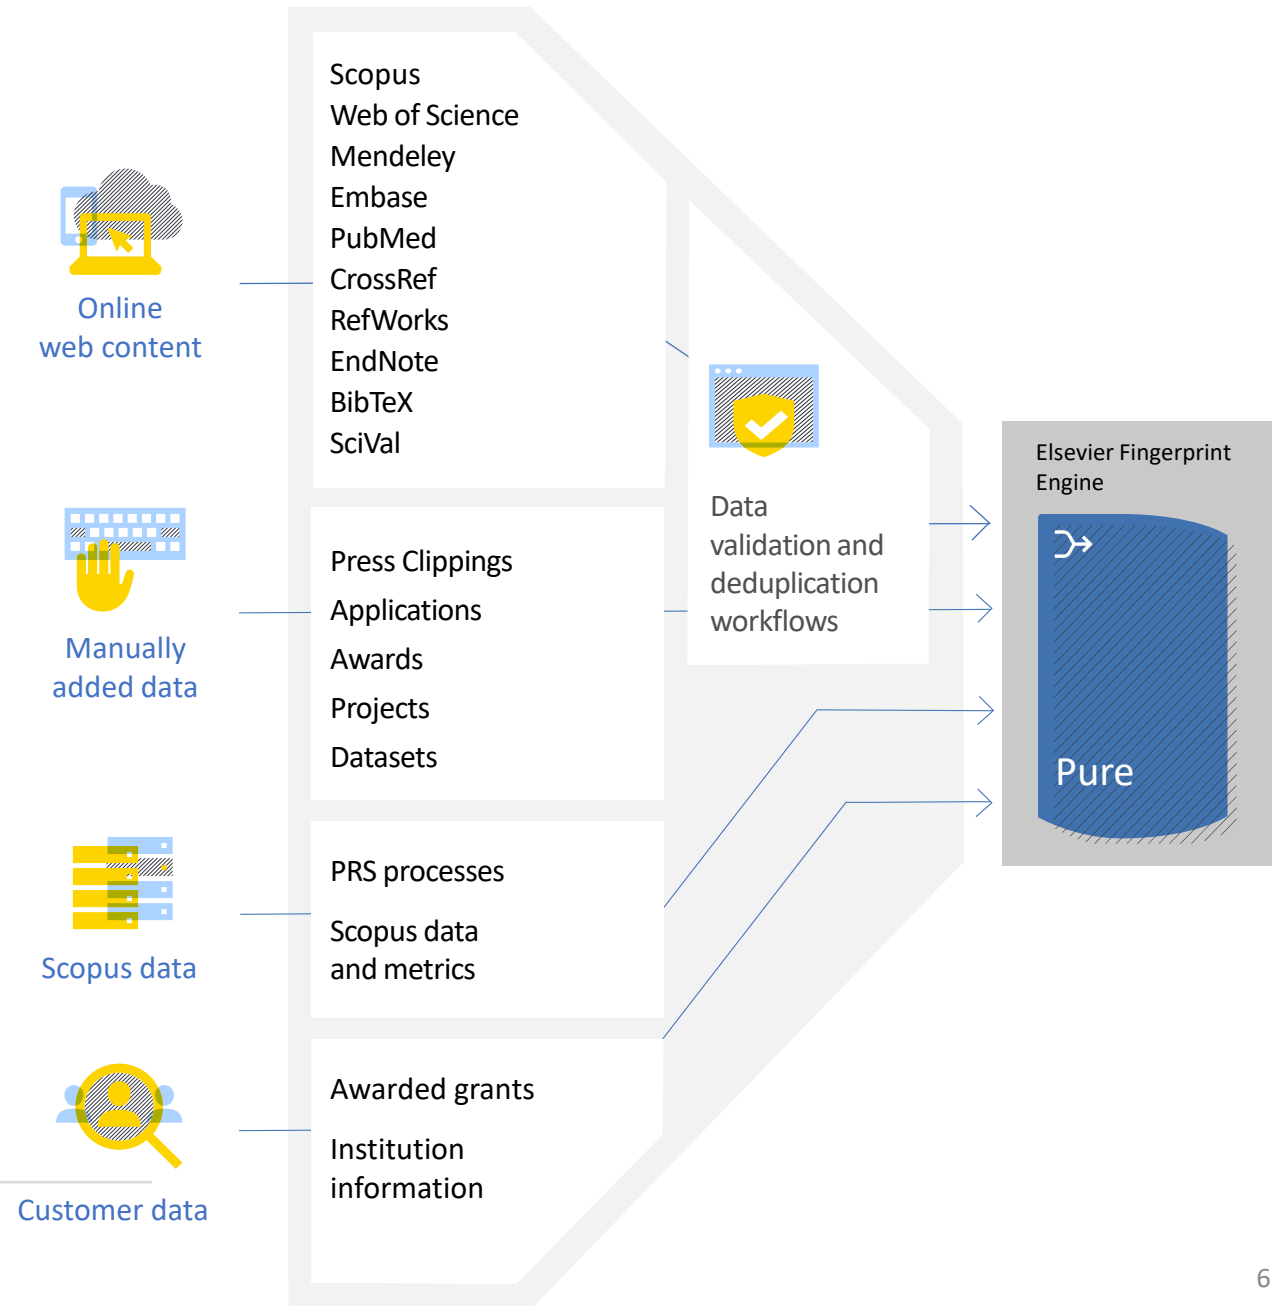

Pure Integration

Simplifies research management, administration and researcher networking and collaboration

| Unique IDs |
|------------------------------|
| Structured information |
| Interconnected data |
| Homogeneous data |
| Available at low cost in FTE |

Importing Data from Multiple Channels

Pure is designed to capture data from a **wide selection of internal and external sources**.

Benefitting from Our Unmatched Expertise

- Pure is the leading globally available commercial RIM solution provider
- 300+ RIM systems implemented to date, and is used in 47 countries
- More than 500,000 researcher and faculty member profiles have been created in Pure
- 20 years of development and improvements to keep up with market requirements/demands (SDGs, Open Access, Covid19), compliance, etc.
- Superior customer service
- Dynamic communities: Pure conference, User groups, Pure Academy & Slack group, Webinar series

Pure Use Cases

The Pure platform is a complete RIM system that aggregates all research information from an institution

Collaborations and top research areas from the last five years

Click dots and donuts to bring up details. [Select a country/territory from the list](#)

Pure Reporting provides better research transparency based on different audience needs

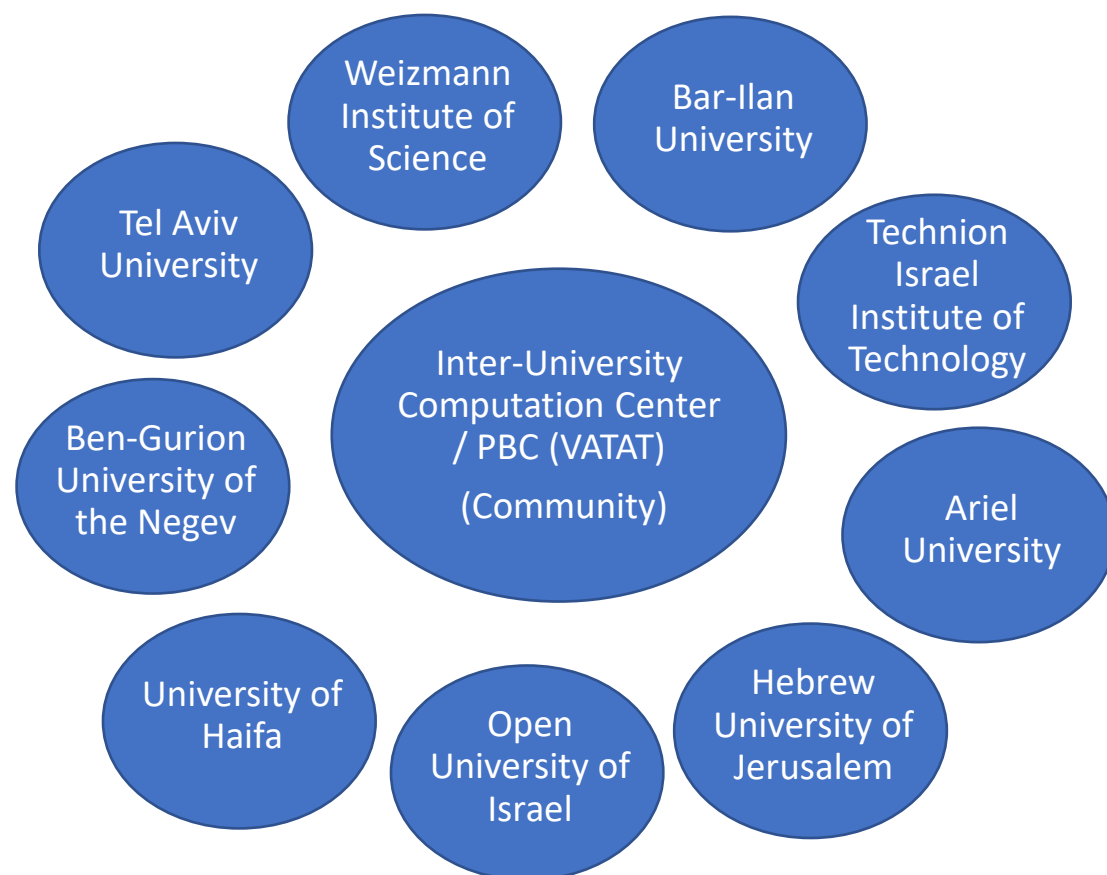

Outcomes

- Performance dashboards
- Customized performance reports
- Research grant income success rates
- CV information
- Open Access management

The Pure Portal enables you to create websites that engage key audiences with curated content

Pure Community Module

The Pure Community module brings data from Academia in Israel together and helps understanding the full impact of community research

- Share data within communities of cross-collaborating institutions
- Imports high-quality, validated data directly from institutions
- Allows institutions to choose the data they share
- Identifies top cross-community collaborators
- Interrelates data from multiple institutions to produce complete findings
- The Community Portal provides a single and uniform showcasing of research across Universities

Overview

1. Introduction to Pure
2. Pure-ORCID Integration
 1. Current functionality in Pure
 1. Export: Personal User & Administrator
 2. ORCID as an import source
3. Improvements to ORCID functionality in Pure
 1. Latest Improvements
 2. Planned improvements

ORCID integration in Pure

- 'Basic' synchronization
 - enables individuals to create their ORCID ID directly from Pure, and links the individual's profile with their ORCID ID
- 'Advanced' synchronization
 - enables Personal Users to authorize Pure as a 'trusted organization' and export content to ORCID.
 - the following content can be exported to ORCID:
 - Personal identifiers (Scopus Author ID, Researcher ID, Digital Author ID)
 - Organizational affiliation information
 - Pure Portal URLs (if enabled in the configuration)
 - Research outputs

Enable export to ORCID (admin)

- For Personal users to export content to Pure, the Administrator or Editor must enable the 'Export to ORCID' functionality in Pure

Export to ORCID

Enable export of Pure content to ORCID

Select whether or not to allow Personal Users to choose to export Pure content to ORCID. Content that will be synchronised includes Research outputs (Published/ePub ahead of print + Publicly visible + Workflow step as configured below), Affiliation details (Institution + Country/Territory + City, as per configuration below), Other IDs (Scopus Author ID, Researcher ID, Digital Author ID), and the Pure Portal URL (if selected below).

1 Export content to ORCID

☒ On

Include former persons

☐ Off

If disabled Pure will not synchronise Pure content for former persons.

1. Enable 'Export content to ORCID'

Publications

Change settings for which publications are exported to ORCID.

Allowed publication status

| Selected publication statuses | Remove all | Available publication statuses | Add all |
|-------------------------------|------------|--------------------------------|---------|
| E-pub ahead of print | | In preparation | |
| Published | | Submitted | |
| | | Accepted/In press | |
| | | Unpublished | |

Pure will only export publications to ORCID if they have one of the selected publication statuses.

Effective workflow step

Validated

Research output prior to this workflow step are not sent to ORCID.

Enable export to ORCID (admin)

Affiliations

The export to ORCID will include basic institutional information for each researcher.

Send Pure Portal URLs to ORCID

2

On

Include individuals' and outputs' Pure Portal URLs in the export to ORCID. When enabled, the individuals' and outputs' Pure Portal URLs will be visible as hyperlinks in the individuals' ORCID page, thereby giving ORCID readers the opportunity to navigate to the Pure Portal for further information on the researcher and the output. Disable if the Pure Portal is not available from the internet.

Export affiliation to ORCID

On

Export organisation affiliations to ORCID

Export detailed affiliations

Off

Export each individual's organisation affiliations.

3

Root organisation*

The Pure University

Organisational unit: University

The organisational unit selected will be exported to ORCID, providing an institutional affiliation for individuals who choose to export their content to ORCID. You must ensure that the selected organisational unit includes the Country/Territory in the Postal address, and it is recommended that you also include the City (otherwise, this will be populated in ORCID as N/A).

Ringgold ID of the Root organisation

The Ringgold identifier (e.g. 9144) of the Root organisation used when exporting affiliations to ORCID. By providing your institution's Ringgold Identifier, when users export their Pure content to ORCID, their institutional affiliation will be recorded in ORCID.

4

ORCID work type mapping file

Pure Research Output types are mapped to the ORCID Work types as per the attached mapping file. You can view this file in Master data > File Handles. If you wish to edit the mapping applied, upload an updated mapping file here.

orcid_worktype_mapping_rules.xml

357 bytes, application/xml

Remove

2. Enable 'Send Pure Portal URLs to ORCID'
3. Set Root Organization
4. Configure ORCID mapping file
(Pure Research Output types are mapped to the ORCID Work types as per the default mappings, but this can be replaced by custom file)

Enable export to ORCID (admin)

- If Pure Portal URLs are enabled, the individual's Pure Portal URL will be visible as a hyperlink in the individual's ORCID page

Affiliations

The export to ORCID will include basic institutional information for each researcher.

[Send Pure Portal URLs to ORCID](#)

☒ On

Include individuals' and outputs' Pure Portal URLs in the export to ORCID. When enabled, the individuals' and outputs' Pure Portal URLs will be visible as hyperlinks in the individuals' ORCID page, thereby giving ORCID readers the opportunity to navigate to the Pure Portal for further information on the researcher and the output. Disable if the Pure Portal is not available from the internet.

[Export affiliation to ORCID](#)

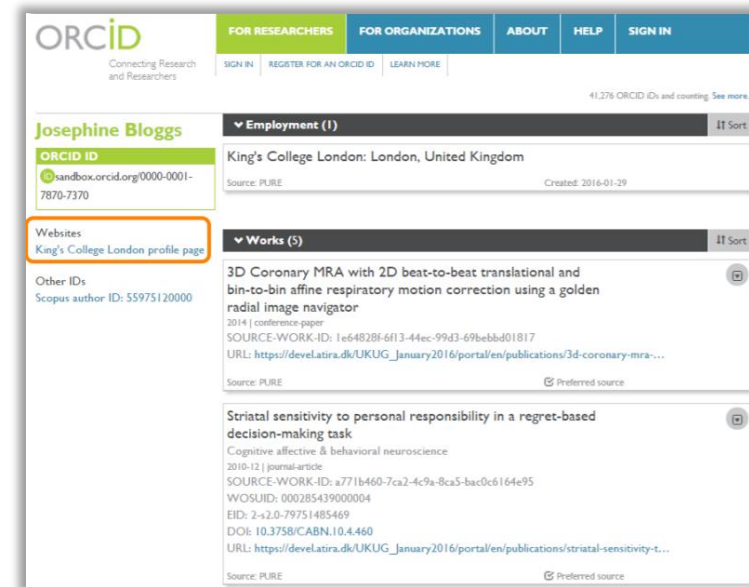

☒ On

Export organisation affiliations to ORCID

[Export detailed affiliations](#)

☐ Off

Export each individual's organisation affiliations.

Enable export to ORCID (admin)

- The export to ORCID includes institutional affiliation information: a Root organization must be set (N.B. this should include Country and City!)

Affiliations

The export to ORCID will include basic institutional information for each researcher.

Send Pure Portal URLs to ORCID

☒ On

Include individuals' and outputs' Pure Portal URLs in the export to ORCID. When enabled, the individuals' and outputs' Pure Portal URLs will be visible as hyperlinks in the individuals' ORCID page, thereby giving ORCID readers the opportunity to navigate to the Pure Portal for further information on the researcher and the output. Disable if the Pure Portal is not available from the internet.

Export affiliation to ORCID

☒ On

Export organisation affiliations to ORCID

Export detailed affiliations

☐ Off

Export each individual's organisation affiliations.

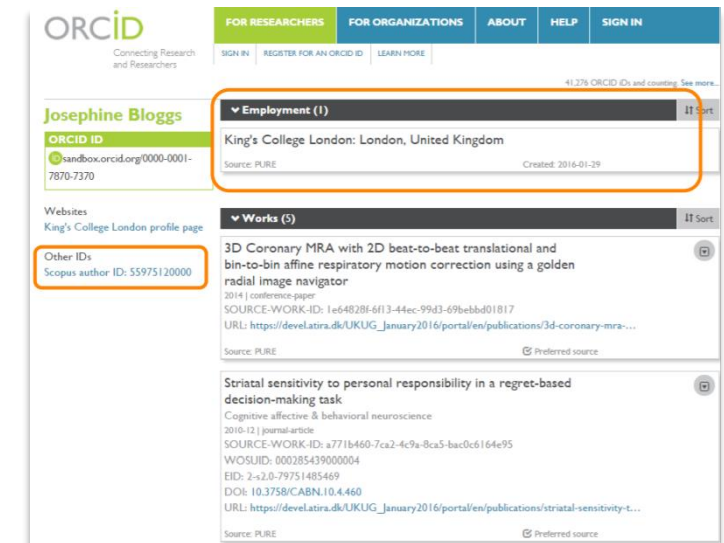

Root organisation *

The Pure University

Organisational unit: University

The organisational unit selected will be exported to ORCID, providing an institutional affiliation for individuals who choose to export their content to ORCID. You must ensure that the selected organisational unit includes the Country/Territory in the Postal address, and it is recommended that you also include the City (otherwise, this will be populated in ORCID as N/A).

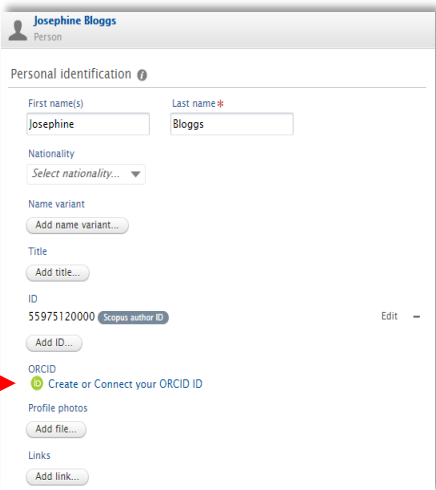

- The Root organization will appear in the individual's ORCID record as their institutional affiliation.

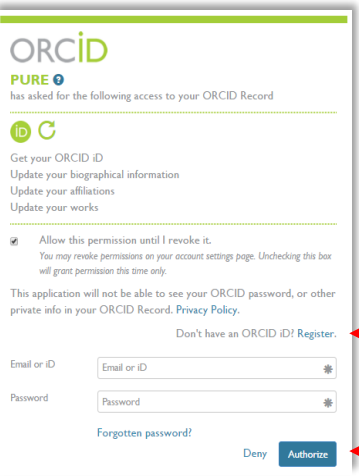

Export to ORCID (personal user)

- Once the 'Export to ORCID' is enabled, Personal Users can authorize Pure as a 'trusted organization' and export content to ORCID
- To export content to ORCID, users must have an ORCID ID that is registered in Pure:

If no ORCID ID is registered, from your personal page you must create and connect an ORCID ID

If you have an ORCID ID, you can authorize Pure as a trusted source (if your ORCID ID is not registered you must do this first)

- The following content can be exported to ORCID:
 - Personal identifiers (Scopus Author ID, Researcher ID, Digital Author ID)
 - Organizational affiliation information
 - Pure Portal URLs (if enabled in the configuration)
 - Research outputs

Overview

1. Introduction to Pure
2. Pure-ORCID Integration
 1. Current functionality in Pure
 1. Export: Personal User & Administrator
 2. ORCID as an import source
3. Improvements to ORCID functionality in Pure
 1. Latest Improvements
 2. Planned improvements

Latest improvements in the last couple of years

- Added detailed affiliations of researcher and option to export all:

- Department
- Role
- Start/End dates added

Affiliations

The export to ORCID will include basic institutional information for each researcher.

Send Pure Portal URLs to ORCID
☒ On
Include individuals' and outputs' Pure Portal URLs in the export to ORCID. When enabled, the individuals' and outputs' Pure Portal URLs will be visible as hyperlinks in the individuals' ORCID page, thereby giving ORCID readers the opportunity to navigate to the Pure Portal for further information on the researcher and the output. Disable if the Pure Portal is not available from the internet.

Export affiliation to ORCID
☒ On
Export organisation affiliations to ORCID.

Export detailed affiliations
☒ On
Export each individual's organisation affiliations.

Export only active affiliations
☐ Off
Export each individual's active organisation affiliations.

- Made document states that can be pushed to ORCID configurable

Publications

Change settings for which publications are exported to ORCID.

Allowed publication status

| Selected publication statuses | Remove all | Available publication statuses | Add all |
|-------------------------------|----------------------------|--------------------------------|-------------------------|
| Accepted/In press | | In preparation | |
| E-pub ahead of print | | Submitted | |
| Published | | Unpublished | |

- Updated sync configuration option to exclude former persons

Export to ORCID

Enable export of Pure content to ORCID

Select whether or not to allow Personal Users to choose to export Pure content to to ORCID. Content that will be synchronised includes Research outputs (Published/ePub ahead of print + Publicly visible + workflow step as configured below), Affiliation details (Institution + country + city, as per configuration below), Other IDs (Scopus author ID, Researcher ID, Digital Author ID), and the Pure Portal URL (if selected below).

Export content to ORCID
☒ On

Include former persons
☒ On
If set to 'Off', Pure will not synchronise Pure content for former persons.

ORCID as an import source

- Personal users can import their research outputs from ORCID to Pure:

The image shows two screenshots of the Pure interface, connected by a red arrow indicating a workflow.

Left Screenshot: Choose submission

- Submission guide
- Research output** (selected)
- Create from template
- Import from online source**
- Import from file
- Activity
- Prize

ORCID

ORCID is a nonprofit organisation helping create a world in which all who participate in research, scholarship and innovation are uniquely identified and connected to their contributions and affiliations, across disciplines, borders, and time. Enabling ORCID as an online import source will allow to import research output metadata available on ORCID's public API.

Right Screenshot: Choose submission

- Submission guide
- Research output** (selected)
- Create from template
- Import from online source**
- Import from file
- Activity

ORCID

Import from ORCID

ORCID identifier

Search

Enter ORCID identifier of a person to search

Search by entering ORCID identifier of a person

Planned Improvements

- Planned improvements starting from version 5.26 (expected for Q1 2023):
 - Update the ORCID API v3
 - Import and export:
 - Datasets and Activities at first stage
 - Followed by Software, Grants & Projects
 - Expand Self-import for new content types

Pure integration with ORCID benefits

- **Re-use of information** – researchers only enter information once and this information is re-used for multiple purposes and systems – **Effort and time saving!**
- **Automatically update and keep researchers' profiles available** – Streamline profile maintenance by automatically updating information on both systems

Thank you!
